

Hailen Mak is my best friend and he is different from me.

First let me tell you the different parts between Hailen Mak and me. Folding paper planes is his hobby and he is shorter than me. Hailen is 121.5 cm tall. We like the same favourite thing. We learn in the same school, Meng Tak Catholic School. We are in the same class, too! He likes folding paper airplanes just like me.

In recess Hailen likes to draw with me at school. I really enjoy it! Sometimes we talk to each other when we have problems. Nice, right? Hailen Mak's favourite subject is English like me! But my English is better than him. I am in the top eight of the class. I get the highest mark in English test. Hailen is the third best.
