

My Introduction.

I'm Gordon. I'm a diligent and attentive student from Meng Tak Catholic School. I enjoy my school life because I like interacting with teachers and students. I gain satisfaction, in particular, when I can communicate with my native English teacher with fluent English. I love English.

I like General Studies as well. I am the "Little Scientist" at school and joined the interschool competition about STEM. My teammates and I presented our experiment and project in the exhibition to judges, teachers and students from other schools. That was a fruitful experience in which I learned to be creative and presentable. Our team got the Merit Award. I hope I can join competitions about STEM again.

I take part in Olympic Maths Challenge too. I learn advanced mathematical skills, logical thinking skills, and solve mathematical problems. I have great interest in it.

My favourite Chinese book is *Journey to the West*. I was amazed with the polished language and meaningful moral lessons. For English books, I love Roald Dahl best. *The Witches* is really impressive as the plot is entertaining. I kept reading until I finished the book in one go.

I am passionate and helpful, so I like helping others. I have been a Game Ambassador. It's not easy sometimes, but I gained great satisfaction with it. In addition, I sell flags and make donations of toys and food regularly to help people in need. It's more blessed to give than to receive.

I am a well-behaved person. Being a monitor in my class, I help to solve problems and quarrels between classmates. I need to report to my class teacher as well and help organizing class events like Christmas celebration in my class.

I hope I can be a teacher in the future. It's a challenging but meaningful job. I hope I can be a teacher of a secondary school. Therefore, I put in as much effort as I can to make my dream come true.
